
TrPP (Flakes)

TrPP

Chemical Name	Triphenylphosphine
CAS No.	603-35-0
EC number	210-036-0
Molecular formula	C ₁₈ H ₁₅ P
Molecular weight	262.29 g/mol

Technical data

Appearance	White to almost white crystalline flakes
Solubility	Clear transparent
Content	≥99.5%
Melting Point	80.0 – 82.0°C
Loss on drying	≤0.10%
Triphenylphosphine oxide content	≤0.50%

Application

Triphenylphosphine is used in production of agrochemicals, coatings, epoxies, fragrances, OXO-alcohols, pharmaceuticals, polycarbonates, resins, vitamins, as catalysts in the synthesis of certain organic compounds. This material is highly soluble in non-polar organic solvents like benzene and diethyl ether.

Triphenylphosphine is also known as TPP, TrPP, triphenyl phosphine and triphenylphosphane.

Packaging

Available packaging: 25 Kg paper bags, 25Kg carton drums and 500kg big bags.
