
Vicura MC-31

Vicura MC-31

Chemical Name: 2-phenyl-2-imidazoline
CAS No.: 936-49-2

General

Crosslinker for highly reactive epoxy powder coatings, accelerator for dicyandiamide, epoxy/polyester hybrids and epoxy phenolic powder coatings.

Technical data

Appearance	Off- white powder
Assay	≥98.00 %
Melting range	98 - 101 °C
Solubility:	Soluble in alcohols

Application

In epoxy system, used as low temperature fast hardener may achieve curing rate 130 °C x 20 minutes.

In dicyandiamide or hybrid system, use as an accelerator.

Packaging

Available packaging: 25KG fiber drums.
