

SilQon TMDSO

SilQon TMDSO

Chemical Name: 1,1,3,3-Tetramethyldisiloxane
CAS No.: 3277-26-7

Technical data

Appearance	Colorless liquid
Boiling point	70 – 71 °C
Assay	≥99.0%
Cl content	≤30 ppm

Application

SilQon TMDSO can be used:

- As building block in production of silicone polymers or silicone resins.
- As chemical intermediate in production of other organosilicon substances.
- In non-aqueous polymer preparation

Packaging

Available packaging: 150Kg plastic drums (other packaging available upon request)
